Skills

Programming: Java, Spring Boot, HTML,

CSS, JavaScript

Databases: MySQL, PostgreSQL

Algorithms: Dijkstra's, Greedy, Dynamic

Programming

Soft Skills: Teamwork, collaboration,

continuous improvement

Cybersecurity:

- **Basic understanding of cybersecurity principles and practices**
- **Familiarity with network security concepts and protocols**
- **Hands-on experience with basic security tools and techniques**
- **Continuously learning through coursework and self-study**

About Me

I am a Computer Engineering student passionate about technology and innovation, with a strong foundation in programming and software development. I specialize in Java and have experience in full-stack development, including Spring Boot for backend applications. My recent projects include designing efficient algorithms for city tour optimization, implementing a greedy algorithm for problem assignments in programming competitions, and developing a Smart Food Delivery and Loyalty System using Spring Boot and MySQL. Last summer, I completed a full-stack development course at Perfect Academy, expanding my expertise in both front-end and back-end technologies. I am particularly interested in artificial intelligence and cybersecurity, and I am always eager to enhance my skills through hands-on projects, internships, and collaborative work.

Education

Dokuz Eylül University,
Department of Computer
Engineering

2022 - 2026
